nights the band played to crowded houses in New York city. Creatore is a remarkable personality. He apparently has every member of his organization hypnotized. While leading the band his long, lank figure is seen in all sorts of gestures, and a false note, should one be played by a member, would be his finale with the aggregation. His ear for music is perfect, and he is always restless, active and alert for any mistake. Creatore, who is but thirty-one years old, came to America less than three years ago and played trombone with an Italian band at Atlantic City and Willow Grove Park, Philadelphia. He was the concert master of the organization, and when the conductor was sick on one occasion Creatore was given the baton. Jealousy was inevitable after this. The band soon split, and Creatore was made conductor of one section of it and played an engagement at the Atlantic Steel Pier from February to July in 1901, followed by an engagement at Willow Grove Park in Philadelphia and a tour of over 15,000 miles all over the Western country. His sucess everywhere was phenomenal. Last spring he severed his connection with that organization and organized a band of his own.
